

ALUMINIUM TRUSS FRAME  
FURNITURE

# Matilda Est

Matilda Est designs and manufactures furniture elements based on welded lattice frameworks in aluminum tubes.

An innovative style translating the construction typology of the truss structures, typically used for civil and mechanical constructions, into distinctive pieces of furniture.

Armchair

## Firmitas. Utilitas. Venustas.

The stylistic research is developed based on the structural consistency of the frameworks: the resulting geometry of the trellis aims to create the synthesis of the three classic Vitruvian paradigms of solidity, function, and elegance.

## The Technology and the Materials

The production techniques are characterized by quality and construction precision of mechanical nature.

The weldments are carried out by specialists' hands, with particular care to the aesthetic result of the joints.

Relaxing chair

## Innovation and Exclusivity

The peculiar combination of design and material, featuring such sharp technical character, abstracts the object and makes it suitable to multiple architectural and functional contexts, both indoors and outdoors.

Sofa

**Yodh**  
Corner Armchair

A name and a brand reinterpreting the Matilde  
di Canossa's monogram.

A tribute to that woman who first lived as a protagonist  
in the history of Europe, with the role of mediator in the  
epochal investiture fight between the Papacy and the  
Empire during the Middle Ages.
